

EVT E6 / mechanical reference

Finished board outline and all 32 optical positions are unchanged from EVT E4.

Bounding box: X 43.849412 .. 176.154557; Y 57.000000 .. 108.955477; height 51.955.

4 copper layers / 1.6 mm finished thickness. Exact milling contour: PCB Edge.Cuts and Gerber.

Do not infer tolerances or mounting clearances from this overview; retain the E4 mechanical fixture.

Orange = LED; teal = photodiode. Filled dot marks pad 1. All views use actual board coordinates.

Fabrication uses the separate support-frame package; controlled routing removes solid tabs after assembly.
