

EVT E6 / front assembly

167 fitted components on front. Filled dot marks pad 1; verify supplier-library orientation before SMT.

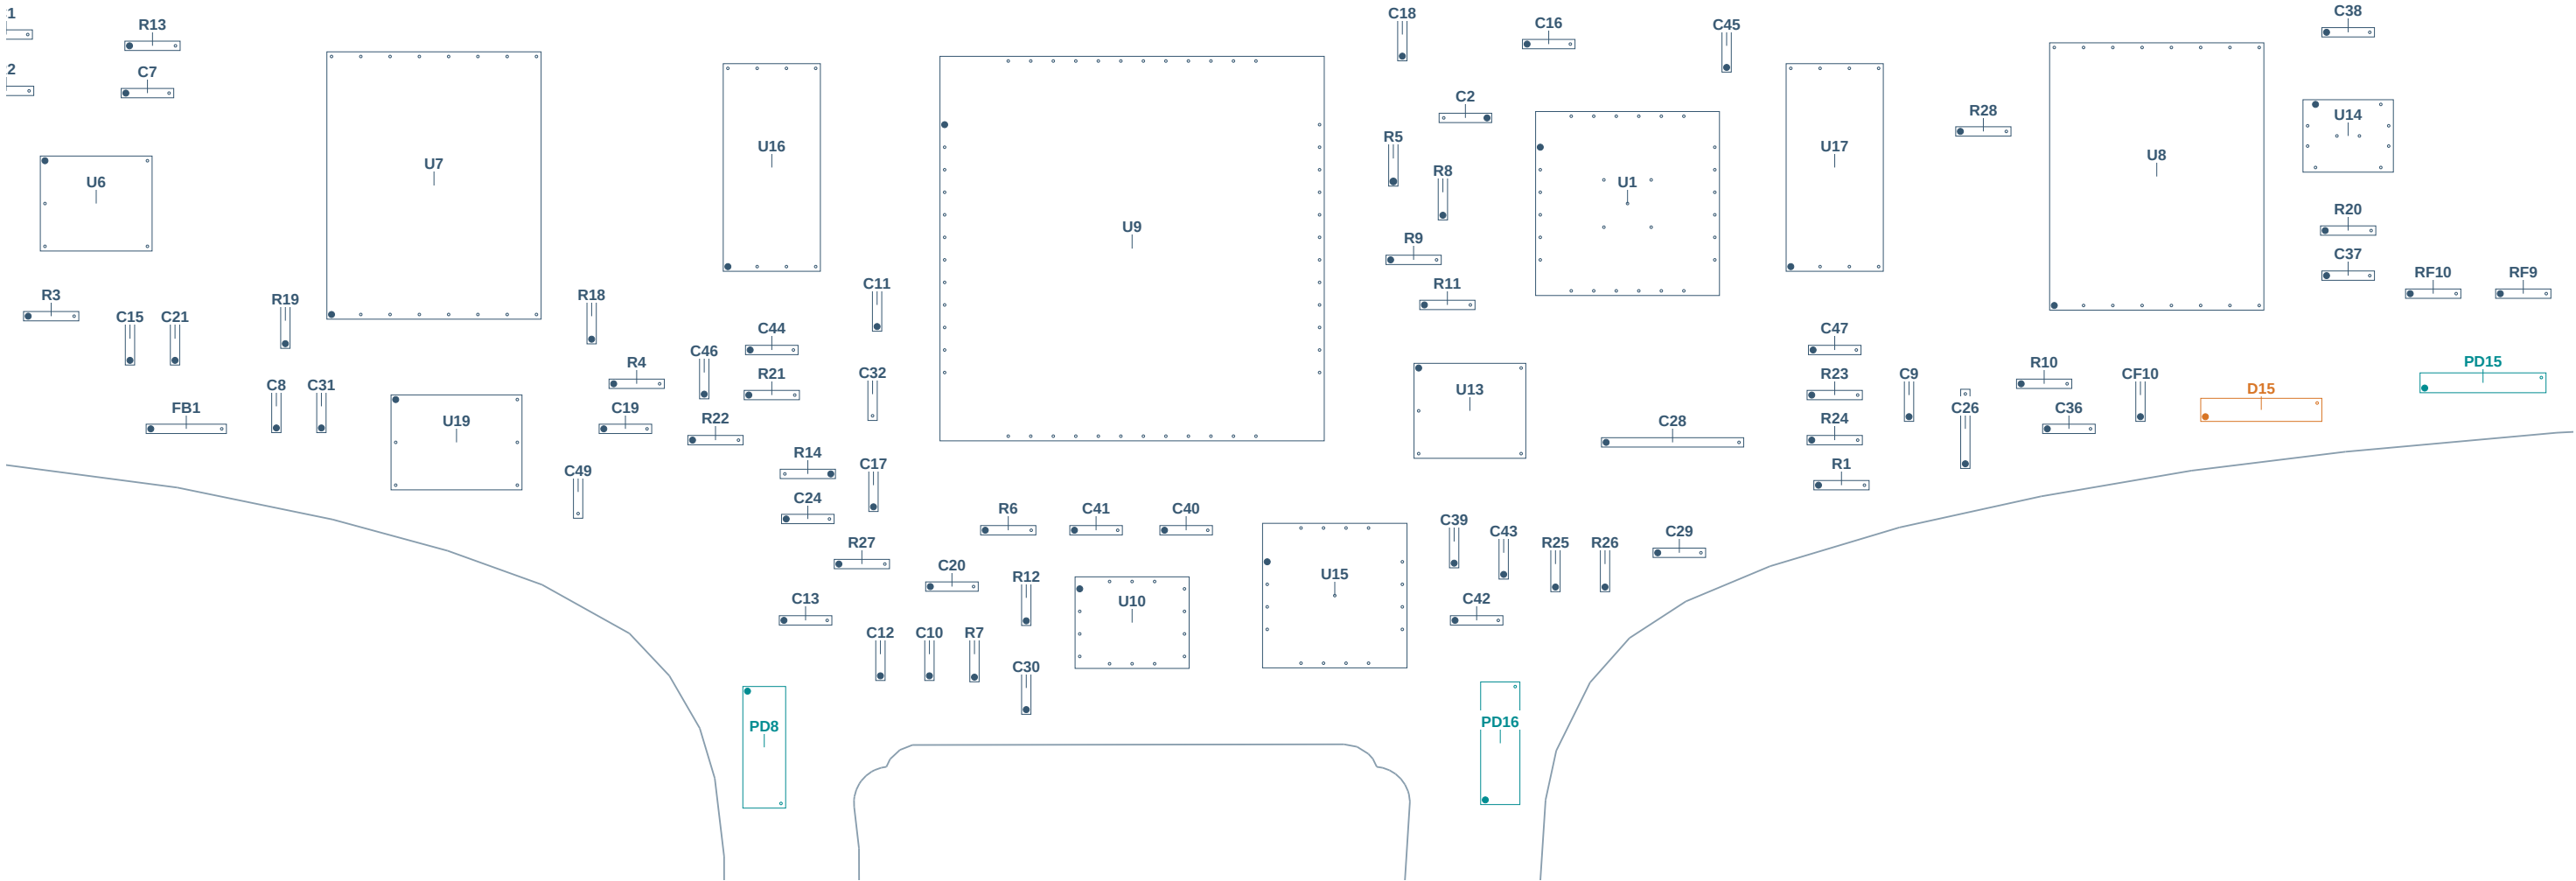

EVT E6 / upper electronics left

Front view. Boxes show pad envelopes; filled dots mark pad 1. Use CPL for exact coordinates.

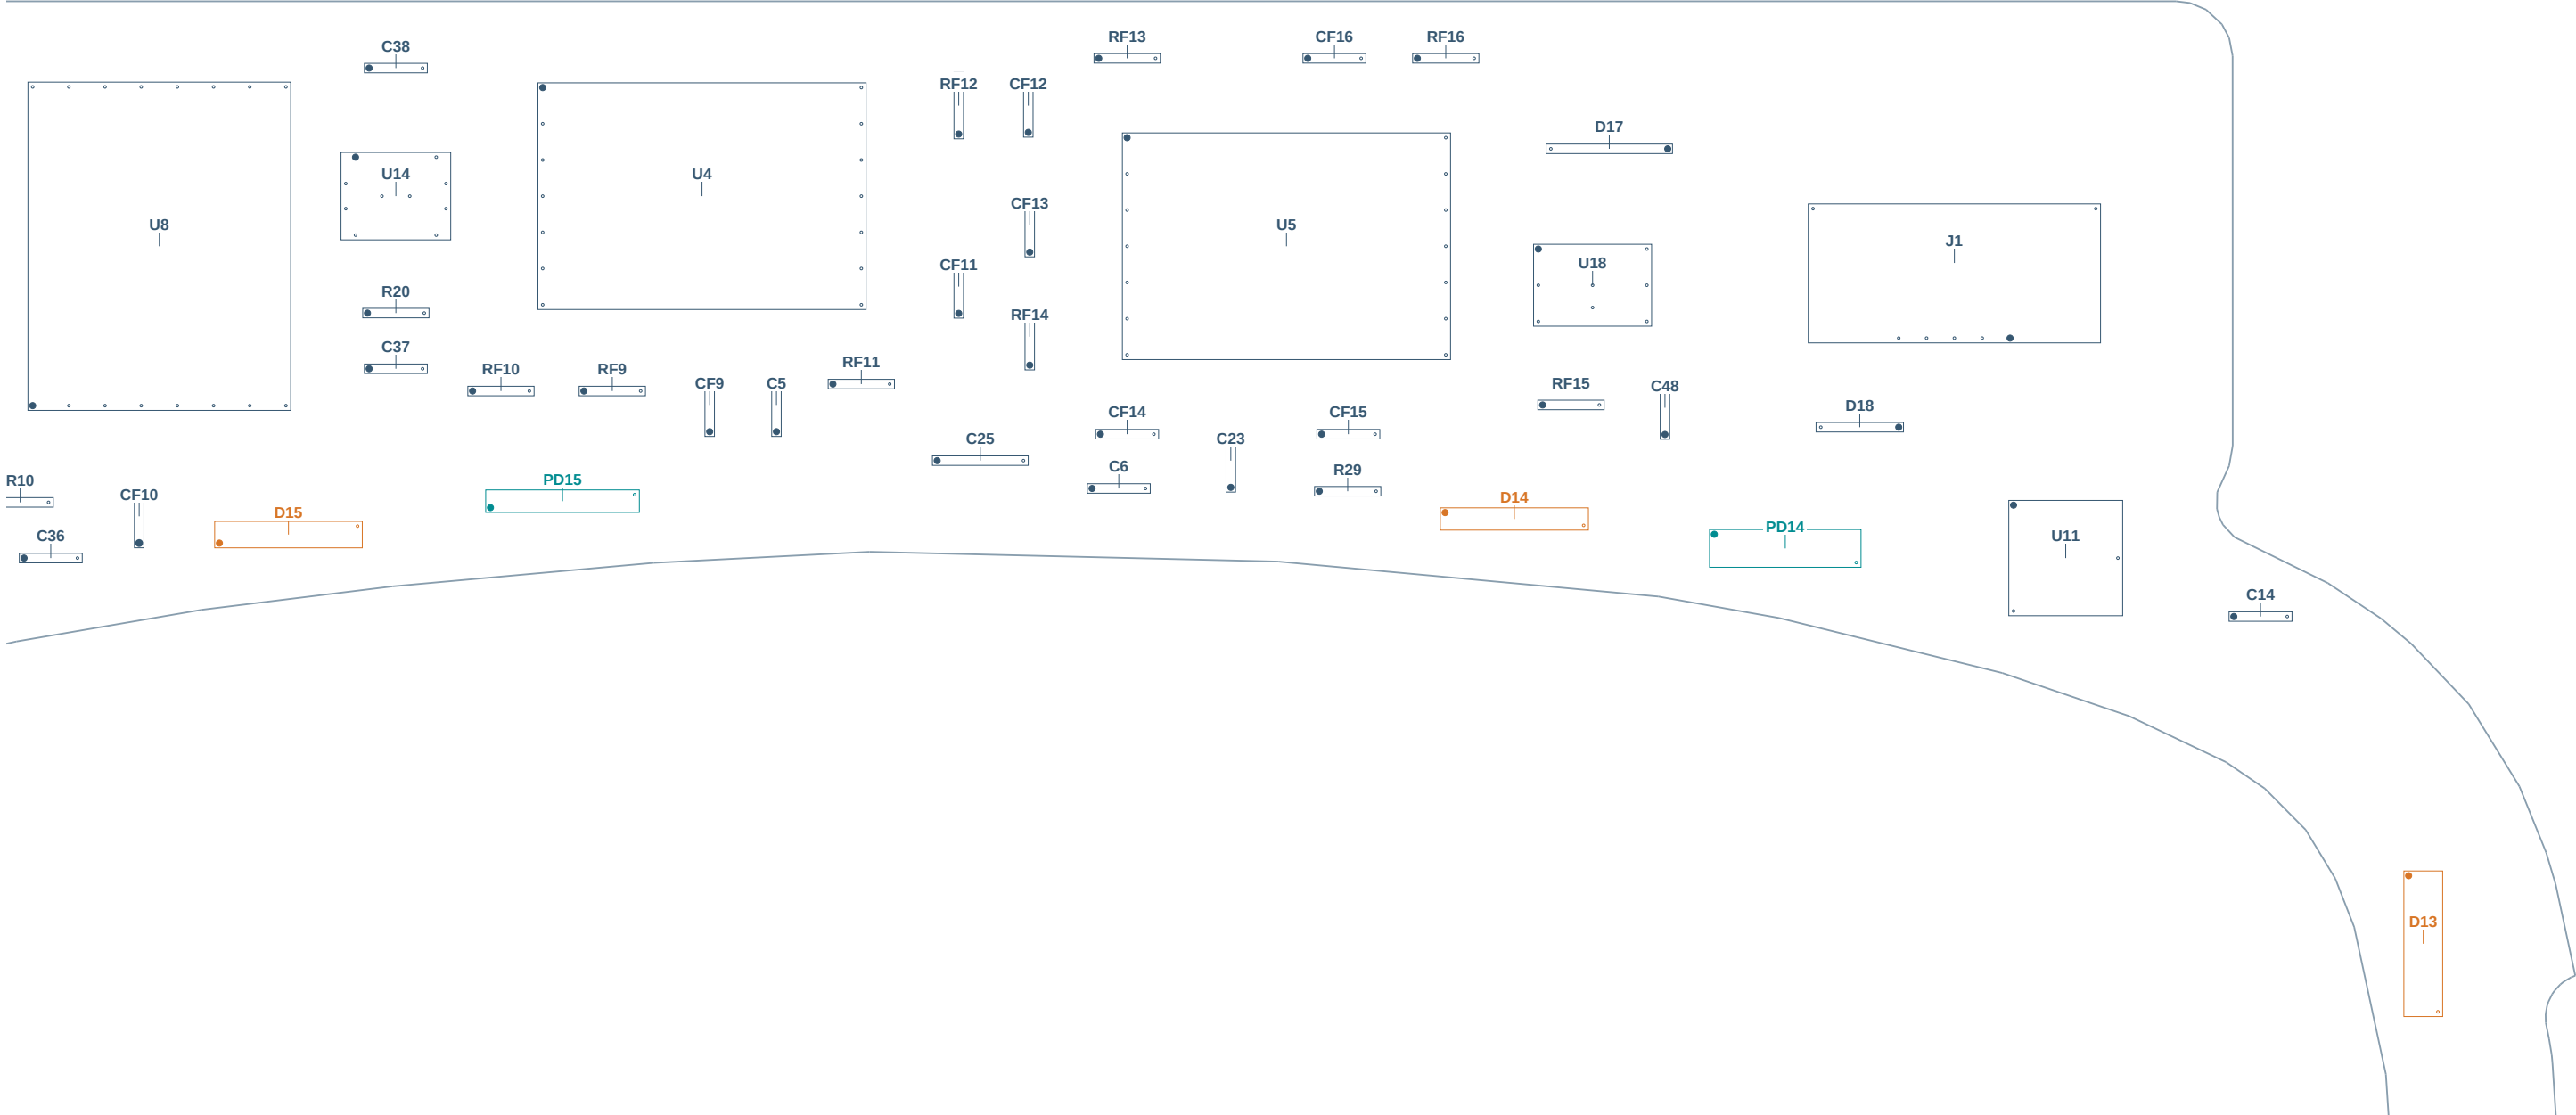

EVT E6 / upper electronics center

Front view. Boxes show pad envelopes; filled dots mark pad 1. Use CPL for exact coordinates.

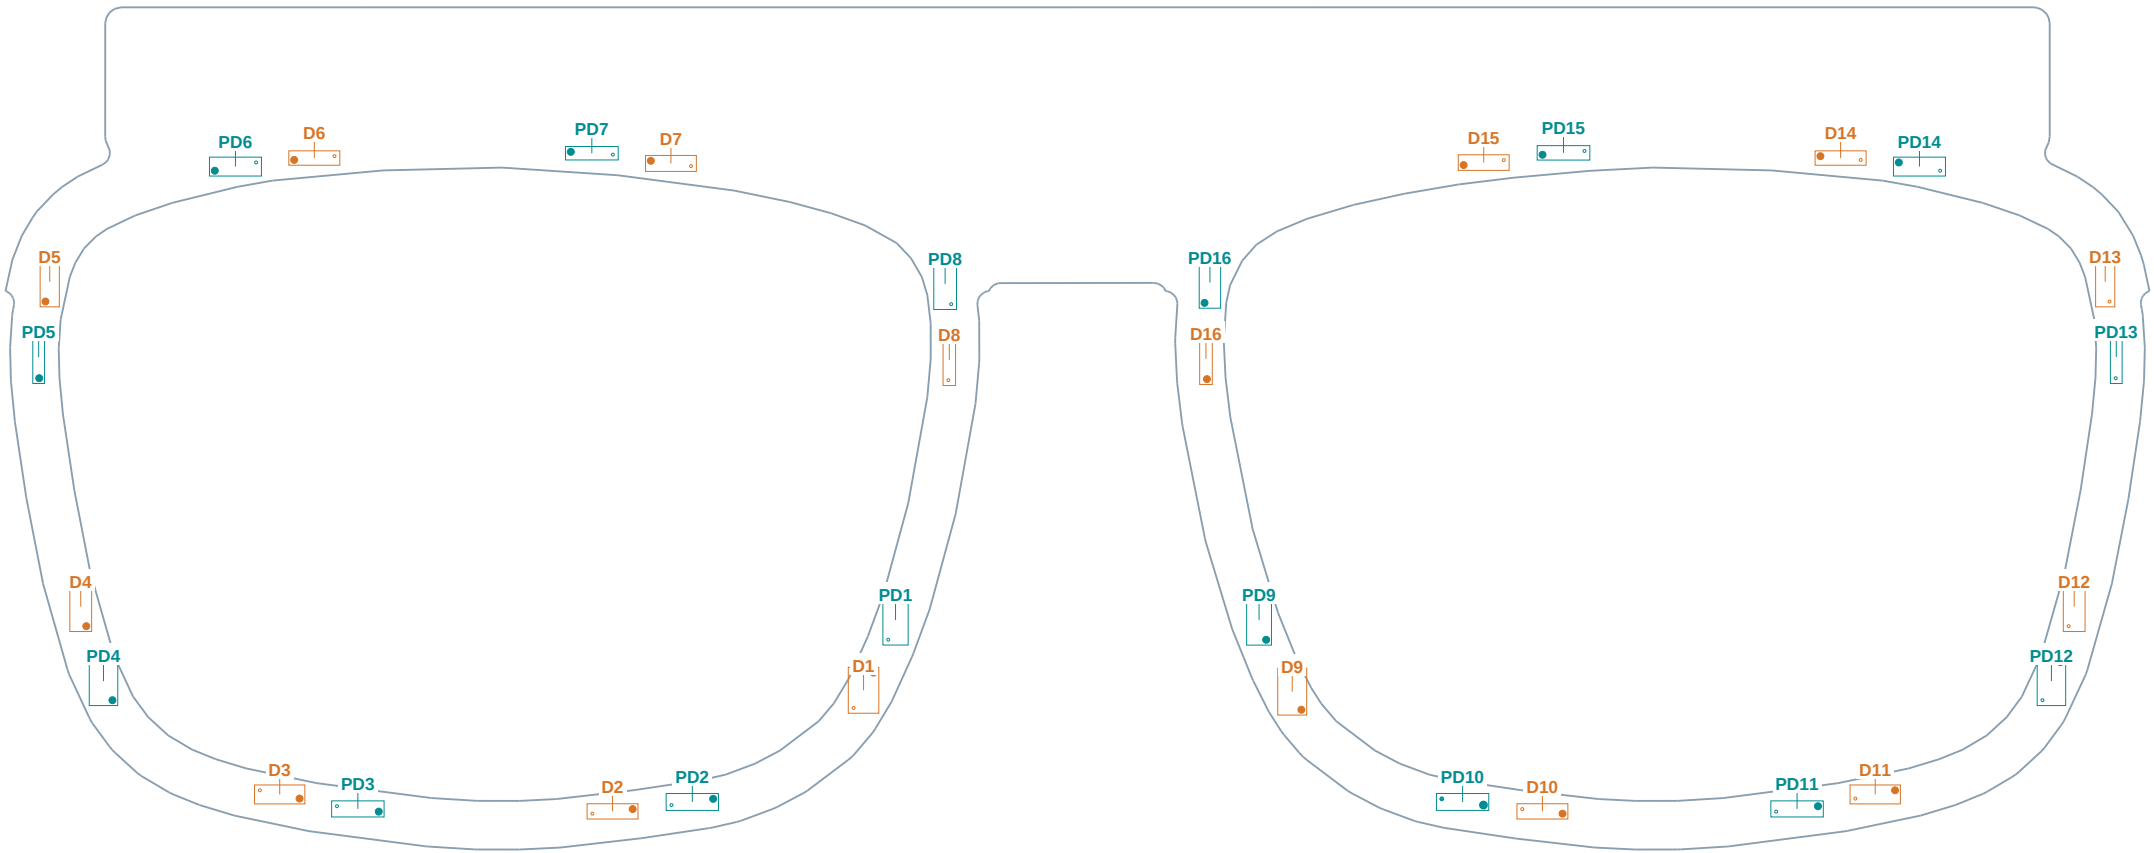

EVT E6 / upper electronics right

Front view. Boxes show pad envelopes; filled dots mark pad 1. Use CPL for exact coordinates.

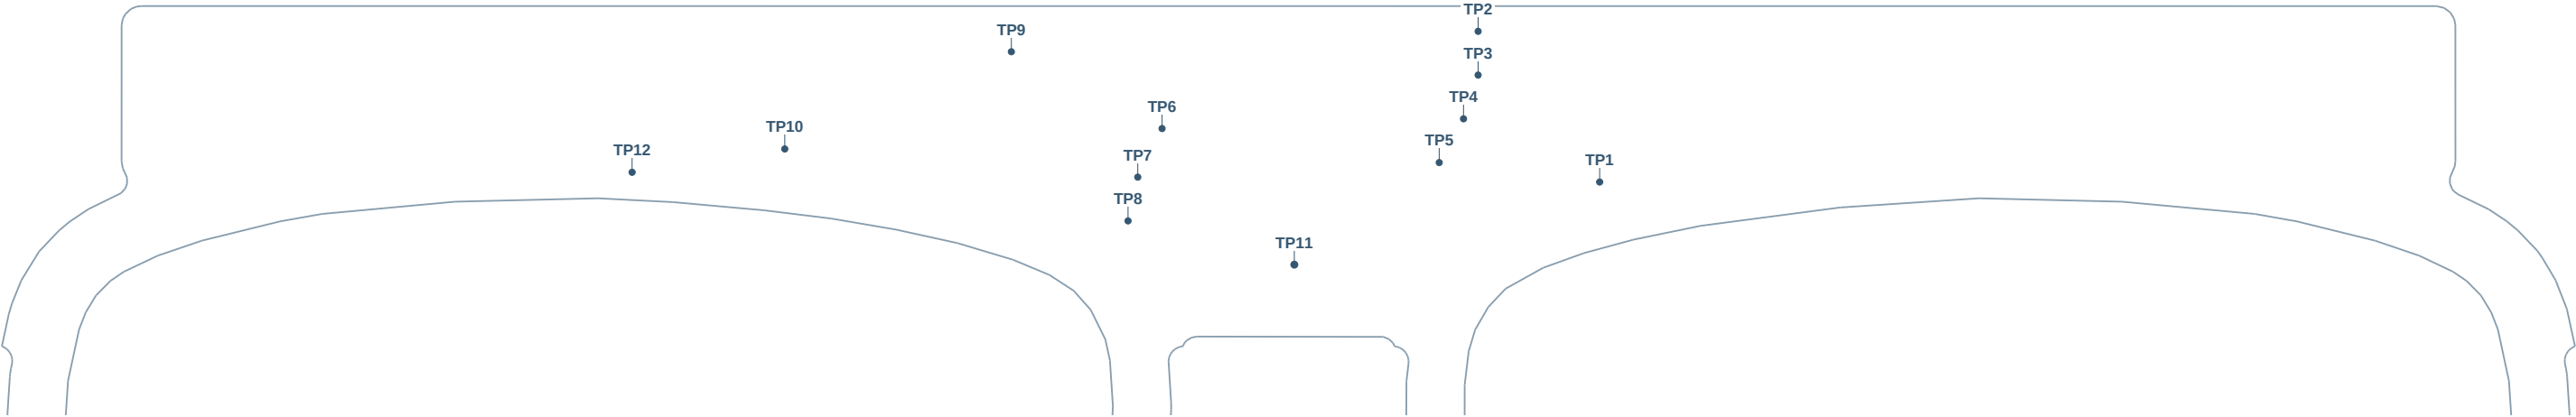

EVT E6 / optical polarity and test access

PD pad 1 = A/GND; pad 2 = K/TIA input. Test pads are on back and are not fitted parts.

Back view (mirrored horizontally): TP1..TP12; J2 remains front-side bare Tag-Connect pads.

EVT E6 / optical coordinate table

KiCad absolute board coordinates. Angles in degrees. E4 comparison is checked independently.
